Washington, DC**

PROCESS FLOWSHEET

Level 4 Plant Design

- Coarse, Fine, and Ultra Fine Coal Cleaning

ANALYSIS

- ADDITION SAMPLING AND TESTING REQUIRED

EQUIPMENT

- Raw Coal Handling
- Crushing
- Washing Devices, Selection and Applicability
 - Multiple Circuits

FLOWSHEET SELECTION

- Matrix of equipment by size fraction
- Simulation of each equipment
- Cost vs Benefit Sensitivity
- Combined Optimization

ESTIMATING CAPITAL COSTS

- Major equipment
- Erection cost

OPERATING COSTS

- Power Demand
- Labor
- Supplies
- R & M
- Administration

US ROLE

- Coal beneficiation design and equipment selection
- Coal beneficiation operations and maintenance
- Power generation from high ash washery rejects
- Project Administration and Overhead
- Travel and Contingency

SUMMARY

- US EXPERIENCE
 - INDUSTRY
 - INSTITUTIONS
 - RESEARCH GROUPS
